Janis Leiker - 209-632-1637 flyinl@aol.com (Please reference Clinic in subject line)

Longe Line and Inhand Trail Clinic

Many people don't know what to do with their yearlings from the time they're weaned to the time they're started under saddle. With the increased interest in yearling longe line, Robin offers a building block system that introduces each step in stages that's not harmful to the yearlings mind or legs easing the transition from baby to show horse. It's easy for both horse and handler to understand and doesn't involve over working the youngster. Careful attention is given to not create problems on the ground that have to be corrected under saddle later on. Please note: Your horse does NOT need to be started in longe line prior to the clinic, nor do they need to be big and strong to begin training. *The is NOT a stressful program and begins teaching them at a stand still.*

Winning Under Saddle Clinic

Gain an understanding of 'cause and effect' so you stop sabotaging yourself without knowing you're doing it. This clinic teaches you how to gain control over all parts of your horse's body through your hands and legs in a building block program from which every other area of training is based using the natural mechanics of the horse. Whether you're just starting out and need some direction, or if you've hit a road block and don't know what to do, this clinic will give you the skills necessary to go to the next level. Please Note: This clinic is for horses of all ages and all levels of training. The younger ones need to be broke enough to ride around safely but don't need to know a lot.

Only 8 slots available per clinic to participate with your horse, so sign up early!

Participate with a horse one day	- \$275
Participate with a horse both days	- \$500
Audit one day	- \$50
Audit both days	- \$75
